

Sling Braids student to bring list.

This class will learn to make a sling braid in the hand. What you will need is as follows.

Three balls of yarns of three colours will be required. The samples shown here are a woollen yarn 4mm dia.

Although the class will concentrate on making hand held braids, students may also like to come prepared with the card shown below as it acts as good template for learning structure.

Preparing the Card

Cut the card to the measurements shown from matt cardboard, similar to that used for mounting pictures. Cut all the numbered slots 5-7 mm deep.
