

Headband Student to bring list.

Each student will supply their own equipment and yarns

This is an inexpensive way to prepare a board for finger weaving. The given size of the board will be suitable for most workshop samples.

The board was made from a Supermarket cardboard box.

Cardboard: Cut two pieces 11in x 15 in (280mm x 380mm) the boards were secured with packing tape around the edge.

Note: Cut the card so that the grain of the card flutes run vertically.

Dowel length: 12 in (300mm) x ¼ in (5mm). Position the dowel 4in (100mm) from the top of the board, pierce two holes either side of the dowel on both sides and secure at the back with a strong cord.

Yarns:

Bring at least five balls of yarn in different colours.

Also bring with you scissors, tape measure and note book.
